

Relativity Short Message Format

We specialize in simplifying eDiscovery, particularly with short message conversions (SMF). SMF conversions are essential for transforming text messages into a legal-ready format, especially in the context of workplace communication. Dealing with the brevity and informality of SMFs can be challenging, but our solution at ID effectively streamlines the entire conversion process, making eDiscovery more efficient and effective.

USER-FRIENDLY NEAR-NATIVES FOR THE FOLLOWING DATA TYPES

Bloomberg

Cellebrite

FB Messenger

Slack Teams

Skype

Teams

Telegram

WhatsApp

What sets ConvertID apart is its ability to provide an immersive review experience for case teams, coupled with unparalleled reporting capabilities.

Our solution ensures that once your data undergoes the conversion process, it mimics the feel of the native source applications within Relativity, enabling efficient analysis and evaluation of the information at hand.
